PROFESSIONAL SUMMARY

Detail-oriented Master's student in Applied Computer Science at SRH University Munich with a strong foundation in data analytics, business intelligence, SQL engineering, Python, web scraping, and backend development. Proficient in transforming raw and complex datasets into structured, actionable insights using Python, Tableau, Power BI, and SQL. Seeking a Working Student (Werkstudent) or Internship opportunity in Data Analytics, Business Intelligence, Data Engineering, or Software Development.

TECHNICAL SKILLS

Data Analytics & BI: Tableau, Power BI, SQL (MySQL), Microsoft Excel, Power Query, Data Cleaning, EDA, KPI Dashboards
Python & Web: Python, Pandas, BeautifulSoup, Requests, Jupyter Notebook, Web Scraping, Data Extraction
Programming & DB: Java, PHP, MySQL, Relational Database Design, Core Data Services (CDS), Data Structures & Algorithms
Developer Tools: Git, GitHub, VS Code, XAMPP, phpMyAdmin, SAP BTP / SAP HANA (Coursework)
Languages: English (Fluent / Professional), German (A1/A2 - Elementary)

KEY PROJECTS & TECHNICAL EXPERIENCE

Python Web Scraping & Data Extraction

Python, Pandas, BeautifulSoup, Requests, Jupyter

Web Scraping & Data Processing Project

- Built a Python-based web scraping workflow in Jupyter Notebook using Requests to retrieve webpage content and BeautifulSoup to parse and extract structured information.
- Used Python loops to iterate through table rows and extract individual row data, then used Pandas to map headers and values into a structured tabular dataset.
- Processed the completed dataset with Pandas and exported the extracted table to CSV for further analysis and documentation.

Airbnb Market Analysis & Interactive Business Dashboard

Tableau Public

Data Analytics & Visualization Project

- Engineered an end-to-end data pipeline in Tableau to analyze 1M+ rental records sourced from Kaggle.
- Designed 4 interactive dashboards featuring KPIs such as Average Price per Zip Code, Property Size Distribution, and Pricing Trends across revenue districts.
- Identified spatial pricing trends and seasonal demand shifts, providing data-driven pricing recommendations for real-estate host optimization.

Global Layoffs Data Cleaning & Exploratory Data Analysis

MySQL

Database & SQL Engineering Project

- Cleaned, standardized, and validated multi-industry workforce datasets using MySQL window functions (ROW_NUMBER()) to deduplicate records.
- Handled missing values, standardized inconsistent date/string types, and performed exploratory trend analysis across companies, sectors, and geographic regions.
- Quantified layoff impact percentages and industry workforce reduction patterns across multi-year intervals.

Interactive Data Survey Analytics Dashboard

Power BI

Business Intelligence & ETL Project

- Pre-processed and cleaned a raw survey dataset (~1,000 records) using Power Query Editor, resolving null fields and optimizing data-model structures.
- Constructed interactive Power BI dashboards using clustered column charts, treemaps, and gauge visuals for demographic segmentation.

Database-Driven Library Management System

PHP, MySQL, Web Stack

Backend Software Development Project

- Architected a full-stack relational database web application implementing complete CRUD functionality, secure user authentication, and administrative workflows.
- Optimized SQL retrieval queries and structured database indexing to reduce record access latency and ensure system reliability.

EDUCATION

M.Sc. in Applied Computer Science

10/2025 - Present

SRH University Munich, Germany

- Focus Areas: Software Architecture, Enterprise Systems (SAP S/4HANA / SAP BTP), Advanced Database Systems, Applied AI/ML.

B.Tech. in Computer Science and Engineering

2019 - 2023

Gayatri Vidya Parishad College of Engineering, India
